

REMARKS

By said communication, Applicants were required to elect a species from the supplements used and provide a listing of claims readable thereon. The Examiner requested that Applicants elect the specific supplements used in the media, or not included in the media, and point out the claims readable thereon. The Examiner pointed out that claim 10 requires supplements to be included in the media, while claims 11-17 required supplements to be excluded from the media.

By this amendment, Applicant has canceled claim 10. Applicant's election of species IGF as the elected supplement remains unchanged which appears in claims 14 and 17.

An Action on claims 1-9, 11-23 and 104-107 is respectfully requested.

Respectfully submitted,

Martin D. Moynihan
